EDUCATION

University of Western Ontario

Apr 2028

Honours Specialization in Computer Science (BSc)

Ivey Business School Advanced Entry Opportunity (AEO), Honours Business Administration (HBA)

Western Scholarship of Distinction (\$3,500), Dean's Honour List

KEY SKILLS & ACCOMPLISHMENTS

Programs & Achievements: Tech@RBC Women's Advisory Program, CPG Case Competition Runner-Up

Programming Languages: Python, Java, TypeScript, JavaScript, SQL, C

Frameworks & Technologies: React, Angular, Node.js, Flask, REST APIs, SQLite, Pandas, Tailwind CSS

Developer Tools: Git/GitHub, Linux, CLI, Jira, Confluence, Vercel, Figma

WORK EXPERIENCE

Software Engineering Consultant Intern

Jul – Aug 2025

BrainRidge Consulting

- Designed and implemented **25+ production-ready Angular components and services** for an AI-powered platform, applying modular architecture, validation, and error handling to improve maintainability and scalability.
- Collaborated within a **20+ member cross-functional Agile team** to translate client requirements into technical solutions and deliver features through sprint-based development.
- Authored and maintained **technical documentation in Confluence**, improving onboarding efficiency and reducing developer clarification time by **4 hours per week**.

Software Engineer Intern

Apr – Jun 2025

Savi Finance

- Contributed to core platform enhancements during a rapid growth phase, supporting a **12% increase in new users** and scaling the application to **1,700+ users**.
- Led front-end development of the "Runway" feature using **React** and **TypeScript**, integrating UI components with **Node.js REST APIs** and translating Figma designs into production-ready code.
- Designed and evaluated **AI-powered data extraction pipelines**, defining **JSON schemas** and testing edge cases to assess **LLM accuracy, reliability, and data integrity**.

PROJECTS

PlanCatalyst – Data Dashboard

Current

- Built **Python data pipelines** to ingest, clean, and normalize **CSV and REST API data** from global sources, enabling consistent downstream analytics and visualization.
- Implemented structured data transformations using **Pandas** and **NumPy**, ensuring **data integrity** across multi-source datasets.

Western Sales Club – Full Stack Application

Apr 2025

- Led front-end development of a **full-stack web application** using **React** and **Tailwind CSS**, implementing responsive components, client-side routing, and reusable UI patterns.
- Collaborated with designers and back-end developers to integrate **Flask-based REST APIs** and **Cloud SQL**, enabling dynamic content management.

TD StairClimb Leaderboard App – Full Stack Charity Website

Oct 2024

- Developed a leaderboard application for **700+ participants**, delivering the project within a one-month timeline.
- Led **UI/UX and front-end development**, wireframing in **Figma** and implementing with **React and TypeScript**.

LEADERSHIP EXPERIENCE

Director of Education

Sep 2024 – Apr 2025

Western Founders Network

- Planned and executed educational events and exam review sessions attended by **150+ students**.

Platform Developer

Jan – Aug 2025

Ignition Hacks

- Designed and implemented the official event landing page for **250+ hackers** using **React** and **Tailwind CSS**.
- Contributed to early-stage **planning and technical decision-making**, shaping participant experience.
