EDUCATION

University of Western Ontario

Apr 2028

Honours Business Administration (HBA), Ivey Business School

Honours Specialization in Computer Science (BSc)

Western Scholarship of Distinction (\$3,500), Dean's Honour List

TECHNICAL SKILLS & PROGRAMS

Programming Languages: Python, Java, TypeScript, JavaScript, C, SQL, Apex, HTML5, CSS3

Technologies: React, Angular, Node.js, Express, REST APIs, Flask, Supabase, Pandas, Tailwind CSS

Developer Tools: Git/GitHub, Linux, CLI, Agile/Scrum, Jira, Confluence, Vercel, Figma

Programs: Tech@RBC Women's Advisory Program (Top 50), Bain CREW Program (Top 9), Notion Campus Leader

WORK EXPERIENCE

Software Developer Intern

May – Aug 2026

RBC (Royal Bank of Canada)

- Refactored **15+ Apex test classes** onto a standardized, inherited test framework and remediated security vulnerabilities across **5+ classes**, strengthening coverage and **deployment reliability** across release cycles.
- Built the **Tasks Tab of the Activities Dashboard** from scratch (summary cards, filters, charts, and a data table) and extended the Grow My Business dashboard in **Salesforce CRM Analytics**, giving product teams self-serve visibility that replaced manual reporting.
- Led a multi-week **proof-of-concept** evaluating Salesforce Big Objects vs. Snowflake for **large-scale storage**, implementing record insertion via recipe and Apex and **batch processing** over large datasets, then translating trade-offs into recommendations.

Software Engineering Consultant Intern

Jul – Aug 2025

BrainRidge Consulting

- Built **25+ reusable Angular components** and services for an AI-powered client workflow platform, wiring **TypeScript** front-end modules to backing **REST APIs** in a modular, testable architecture.
- Collaborated with a **20+ member Agile team**, contributing across planning, implementation, code review, testing, and documentation each sprint.
- Streamlined **Confluence documentation** for shared components and workflows, cutting developer clarification time by **~4 hrs/week** and easing onboarding for new engineers.

PROJECTS

PlanCatalyst – Country-Level Forecasting Dashboard

Apr 2026

- Built modular **Python** data pipelines (**Pandas, NumPy**) with separated fetch, clean, and orchestration layers to ingest UN SDG, ND-GAIN, and World Bank data for reproducible forecasting.
- Implemented composite index scoring and **regression-based forecasting**, surfacing results through interactive, accessible **Power BI** dashboards.

Circl. – Agentic AI Upcycling Tutorial Generator

Jan 2026

- Built an **AI-powered web app** converting waste photos into step-by-step DIY tutorials, using **React, Vite, Tailwind CSS**, a **Node/Express** backend, an OpenRouter multimodal pipeline, **Supabase Auth**, and schema-based **REST APIs**.

TD StairClimb Leaderboard App – Charity Platform

Oct 2024

- Shipped a live **web-based leaderboard** for a **700+ participant** national charity event on a **1-month timeline** with a **React and TypeScript** front end and a component-driven architecture, deployed on **Vercel**.
- Led **UI/UX and front-end development**, translating Figma wireframes into reusable components with responsive layouts and polished loading, empty, and error states.

LEADERSHIP EXPERIENCE

Nonprofit Developer

Sep 2025 – Present

Tech for Social Impact

- Led **full-stack development** of client-facing applications for nonprofit organizations, including **United Way Elgin Middlesex**, translating stakeholder requirements into functional, maintainable web solutions.

Consulting Analyst

Oct 2025 – Apr 2026

Ivey FinTech

- Designed a **fintech product for 12,000+ users** with a cross-functional team, translating business requirements into product and system design decisions ahead of rollout.

INTERESTS

Formula 1, hackathons, soccer, running, dance, golf, acoustic & electric guitar, piano, thrifting.
